

New...In The NASA History Series

Toward a History of the Space Shuttle, An Annotated Bibliography, Part 2, 1992-2011

Compiled by Malinda K. Goodrich, Alice R. Buchalter and Patrick M. Miller of the Federal Research Division, Library of Congress

(Washington, D.C.: NASA SP-2012-4549)

The NASA History Program's first monograph, issued in 1992, was an annotated bibliography of the Space Shuttle Program. With the conclusion of the Space Shuttle Program, we've returned to this theme to produce an updated bibliography that covers the final two decades of the Program. Compiled by the Federal Research Division of the Library of Congress, the new volume contains bibliographic data and a short summary of works that were judged most essential for researchers writing on Space Shuttle history. The sources include books, magazine and journal articles, Congressional hearings, and government publications.

The monograph is available free of charge in a number of formats. eBook and PDF versions are available for download at: http://www.nasa.gov/connect/ebooks/shuttle_bibliography_2_detail.html. (The original monograph is out of print, but a PDF copy is available through the link above.)

A free hard copy is available at the NASA Information Center (in the NASA Headquarters Library at 300 E Street SW, Washington, D.C.). For mail delivery of a free copy, send a self-addressed stamped 9 ½ x12 envelope (\$2.30 media rate, \$5.30 first class) to NASA Headquarters History Program Office, Public Outreach Division, Office of Communications, Washington, D.C. 20546-0001.
